

SUPPLEMENT NUMBER 6
TO
INTERNATIONAL PERSONAL PROPERTY RATE SOLICITATION I-12

EFFECTIVE DATE: **1 FEBRUARY 01**

EXPIRATION DATE: **14 APRIL 01**
(UNLESS SOONER CANCELLED,
CHANGED OR AMENDED)

a. Shipments transported pursuant to the terms and conditions of this solicitation will be subject to a fuel related surcharge equal to 3 percent of the applicable linehaul transportation charge (see below) as set forth in this solicitation.

b. The total applicable linehaul transportation charges, as determined in accordance with the rate tables in Chapter V, Schedules A and C (excluding Hawaii and/or Alaska) of this solicitation, are to be increased by the fuel related surcharge of 3 percent for household goods and unaccompanied baggage. To determine the proper increase to apply, the actual mileage must be obtained using the governing regulation contained in Item 405. Determine the mileage from the shipment origin or destination to the water port or aerial port utilized and shown on the ocean bill of lading or airway bill. Multiply the total applicable linehaul transportation charge times the hundredweight of the shipment, and then multiply this total by 3 percent to determine the fuel-related surcharge.

c. Fractions of one cent will be disposed of as follows:

(1) Fractions of one-half cent or more will be increased to the next whole cent.

(2) Fractions of less than one-half cent will be dropped.

Note 1: Notwithstanding any other provisions of this solicitation, the fuel related surcharge **WILL APPLY** to transportation charges applicable on storage-in-transit shipments when such shipments are delivered to or removed from storage-in-transit warehouse during the effective period of this supplement.

Note 2: The fuel related surcharge is to be shown separately from the other charges on the **PPGBL** and for the purpose of identifying the amount as a fuel-related surcharge. The following information will be entered on the **PPGBL**:

a. Formula: Rate (from Schedule A or C) x Hundredweight x 3 percent = Charge.

b. Example: 5000-pound household goods shipment from Biloxi, MS, to Frankfurt, GE. Carrier uses port of Jacksonville, FL. Mileage from Biloxi to Jacksonville is 467 miles. Rate from Schedule A is \$16.70. Therefore, fuel surcharge would be computed as follows:

$$\$16.70 \times 50 = \$835.00 \times 3\% = \$25.05$$

c. Example: 500 pound unaccompanied baggage shipment from Scott AFB, IL, to Ankara, TU. The designated port for Code J to Turkey is Dover AFB, DE. Mileage from Scott AFB, IL, to Dover AFB, DE, is 914 miles. Rate from Schedule C is \$31.00. Therefore, fuel surcharge would be computed as follows:

$$\$31.00 \times 5 = \$155.00 \times 3\% = \$4.65$$

d. Entry on Block 25 of the **PPGBL**, carrier will enter: “**ITGBL** Fuel Surcharge – (actual chg; # miles; (point) to (point)).” (Note: All miles will be computed in accordance with Item 405)

EXCEPTION TO THE APPLICATION OF THIS SUPPLEMENT:

This supplement will not apply to the overseas linehaul costs or for ocean and/or water movement portion of shipments.
